

TEAMS 6.1 Release

February 13, 2023

Agenda

- This webinar is designed to give you detailed information about the defects that were released in TEAMS 5.8.1, 5.8.2, 5.8.3., 5.9, 6.0, and 6.1.
- In this webinar, we'll be discussing TEAMS functionality only, not policy or performance.
- Also, this webinar will be sectioned by functionality, not by release.

Agenda Specifics

ID	Name
491024	 Correct Test Instrument level for PID 2169587
472014	 Fix Incorrect Profile Education Info for Participant 1624211
435070	 Data Fix 532-Victoria College participants with duplicate contact hours
319043	 Modify the MSG Management Report to include the all of the participants' MSGs for the time period that report is subm
232035	 Create a new POP Exiters Management Report
219053	 Modifv MSG and POP report to be able to select multiple Providers.

Report Defects (1)

232035 - Create a new POP Exiters Management Report.

- The report universe is the unduplicated list of periods of participation (POP) by POP ID whose Last Service Date (LSD) + 90 days is within the report date range.
- The report data range cannot be more than one calendar year quarter.
- The report is NOT a performance report. It is a management report.

Report Defects (2)

319043 - Modify the MSG Management Report to include all the participants' MSGs for the time period that the report is submitted for, not just the most recent.

219053 - Modify MSG and POP reports to be able to select multiple Providers.

- *Note: Unfortunately, It looks like the provider filter is still not being applied properly. The report is pulling participants that have POPS within the report date range but were served by the selected provider in prior PYs.*
